Changing Dynamics in the Digital Age

The digital revolution has enabled important changes in the practice of politics. Opportunities to engage in a particular form of civic and political engagement—a set of practices we refer to as participatory politics—have expanded significantly. Participatory politics differ from more traditional institutional politics in that they are peer-based, interactive, and not guided by deference to traditional elites and institutions, such as political parties or newspaper editorial boards. Responding to the significant opportunities and risks associated with these new dynamics requires significant shifts in civic education. Preparation for core practices of civic and political engagement, such as investigation, dialogue and feedback, production, circulation, and mobilization, must be taught differently because they are now frequently practiced differently and often in different contexts.

Empowered by the affordances of digital media, individuals and networks of young people are able to investigate issues they care about, engage in dialogue with their peers and community, produce and circulate compelling messages, and mobilize others around a common cause. Online participatory politics are now commonplace, and youth are at the forefront. In the pages below, we detail how these practices have changed in the digital age, the opportunities and risks these changes create, and the implications for educators.

## Dialogue and Feedback:

<table>
<thead>
<tr>
<th>Common Historical Practices</th>
<th>Expanded Practices in the Digital Age</th>
<th>New Opportunities for Youth</th>
<th>Potential Risks</th>
<th>Implications for Educators</th>
</tr>
</thead>
</table>
| · For youth, dialogue about social issues occurred either in private circles with family and friends or with peers in school.  
· Structured forums for dialogue and feedback primarily happened at specified times and locations, such as a town hall or school board meetings.  
· Many opportunities for feedback—such as voting, calling one’s representative, or writing a letter to the editor—were structured by institutions. | · There are increased opportunities for feedback in online forums, such as commenting on news websites, creating online petitions, and generating viral campaigns intended to pressure a representative.  
· Dialogue about social issues can occur with a broader range of people in online spaces, such as Facebook, Twitter, chat rooms, etc. | · Youth have increased opportunities to engage in dialogue and feedback outside of structured forums and institutional contexts.  
· There are expanded chances for youth to voice their opinions and perspectives to a wide audience. | · Youth only engage in spaces and dialogue with like-minded individuals, called echo chambers.  
· Incivility and offensive dialogue can dominate online dialogic spaces that are not regulated by any clear norms or guidelines and where anonymity is common.  
· In an effort to draw attention, everyday experiences of ordinary lives and struggles can be crowded out by sensationalized accounts.  
· Support youth to engage in:  
  · Expressing one’s perspective persuasively in a digital format  
  · Sharing one’s point of view with respect and civility even when there is no face-to-face relationship  
  · Tapping social networks to engage in dialogue with people with diverse perspectives  
  · Reflecting on the impact of dialogue and expression on their own identity while being aware of the risks of disclosure, online bullying, and echo-chambers | Support youth to engage in:  
· Expressing one’s perspective persuasively in a digital format  
· Sharing one’s point of view with respect and civility even when there is no face-to-face relationship  
· Tapping social networks to engage in dialogue with people with diverse perspectives  
· Reflecting on the impact of dialogue and expression on their own identity while being aware of the risks of disclosure, online bullying, and echo-chambers |

### Production:

<table>
<thead>
<tr>
<th>Common Historical Practices</th>
<th>Expanded Practices in the Digital Age</th>
<th>New Opportunities for Youth</th>
<th>Potential Risks</th>
<th>Implications for Educators</th>
</tr>
</thead>
<tbody>
<tr>
<td>· The production of ideas and media was largely limited to elites and “professionals” within organizations and institutions.</td>
<td>· Accessible digital tools enable youth to engage in production from creating a video to building their own website.</td>
<td>· There are new and expanded opportunities for youth to contribute to the flow of information and to shape the narrative around civic and political issues. · Youth have voice and agency in spaces where they can also produce ideas and media.</td>
<td>· When working with limited resources, civic and political production projects can require an intensive amount of work over a long period of time that is increasingly unsustainable.</td>
<td>Support youth to engage in: · Use digital tools and platforms for transmedia production · Strategic use of the appropriate tools and the best use of the tools · Determining how to craft a persuasive message that will reach a targeted audience</td>

Mobilizing for Change:

<table>
<thead>
<tr>
<th>Common Historical Practices</th>
<th>Expanded Practices in the Digital Age</th>
<th>New Opportunities for Youth</th>
<th>Potential Risks</th>
<th>Implications for Educators</th>
</tr>
</thead>
</table>
| · Political organizations mobilized large numbers of people around a civic or political cause using their capacity and resources, such as door-to-door canvassing or tapping an organizations’ membership. | · Social networks can be mobilized without the need for organizational resources.  
· Young people might start a new political group online, write and disseminate an online petition, or raise money for a civic cause via a Kickstarter campaign. | · Youth have relevant digital skills and capacities that can be turned toward mobilizing others to back a civic or political issue of concern.  
· Social networks increase young people’s opportunities to be mobilized and to respond to an issue shared by someone they know and trust.  
· Youth can take advantage of varying levels of engagement through the fluid and flexible use of digital media. | · Requests to get involved can come from individuals and groups that are unknown and potentially untrustworthy.  
· Complex issues can be misunderstood and/or conflated when information is simplified and shortened to more easily mobilize others.  
· Individuals and groups can mobilize around savior-like responses that do not effectively address the complexity of the situation. | Support youth to:  
· Tap social and digital platforms to organize and mobilize others  
· Determine tactics and strategies for building support  
· Identify appropriate and relevant responses based on a nuanced understanding of an issue  
· Anticipate the impact of action, and reflect on possible outcomes and unintended consequences |
